

Gartner plaatst NetIQ in leiderskwadrant voor Security Information and Event Management Magic Quadrant

Alphen aan den Rijn, 8 juli 2009 – NetIQ, onderdeel van Attachmate, is door Gartner, Inc. geplaatst in het leiderskwadrant van Security Information en Event Management (SIEM) 2009*.

“Onze positionering in het leiderskwadrant van het Magic Quadrant SIEM laat zien dat we met onze producten, door continue ontwikkeling blijven voldoen aan de steeds hogere eisen die bedrijven stellen aan hun SIEM-oplossing”, aldus Michel van der Laan, Sales Director bij NetIQ. “Door de integratie van traditionele SIEM-functionaliteit met [file integriteit en detectie van veranderingen](#) worden mandaten nageleefd en zijn organisaties in staat om hun security programma’s te stroomlijnen en kritische data te beschermen en hun gehele security beleid te verbeteren.”

NetIQ Positioned in the Leaders Quadrant for Leading Industry Analyst Firm's Security Information and Event Management Magic Quadrant

2009 Report Evaluates Ability to Execute and Completeness of Vision

NetIQ Corporation, an Attachmate business, today announced that Gartner, Inc. has positioned NetIQ in the Leaders Quadrant in the 2009 Magic Quadrant for Security Information and Event (SIEM) report*.

Gartner's 2009 Magic Quadrant report for SIEM "evaluates technology providers with respect to the most common technology selection scenario — a [SIEM](#) project that is funded to solve a compliance reporting issue, but with secondary requirements for effective threat monitoring and security event management (SEM). There are numerous variations in SIEM product architecture and deployment options, and wide variation in capabilities for log management, SEM and user monitoring."

"We believe our positioning in the Leaders Quadrant for the SIEM Magic Quadrant further validates how NetIQ continues to evolve its products to meet organizations' ever-increasing requirements for comprehensive SIEM solutions," said Michel van der Laan, Sales Director at NetIQ. "By integrating traditional SIEM functionality with the [file integrity and change detection](#) already required by compliance mandates, organizations are best able to streamline their security programs, protect critical data and improve their overall security posture."

NetIQ® Security Manager™ arms customers with superior data protection for their environment – comprising security event management, privileged user management, and [host log analysis](#) in one console. The integrated, scalable architecture of NetIQ Security Manager uniquely satisfies numerous enterprise compliance mandates while enabling the automation of security activity reviews, log preservation, change auditing and incident response. About the Magic Quadrant

The Magic Quadrant is copyrighted 2009, by Gartner, Inc., and is reused with permission. The Magic Quadrant is a graphical representation of a marketplace at and for a specific time period. It depicts Gartner's analysis of how certain vendors measure against criteria for that marketplace, as defined by Gartner. Gartner does not endorse any vendor, product or service depicted in the Magic Quadrant, and does not advise technology users to select only those vendors placed in the "Leaders" quadrant. The Magic Quadrant is intended solely as a research tool, and is not meant to be a specific guide to action. Gartner disclaims all warranties, express or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.
