

NetIQ Education & Training

At NetIQ, Education and Training is a best practice, which enables your organisation to optimise the use of our award-winning products. NetIQ Education & Training offers product and process education, which by improving productivity, helps generate a greater return on your investment. All courses feature hands-on exercises and real-world examples to help you quickly gain the knowledge and skills required to use NetIQ products effectively. Our staff of professional trainers are all industry practitioners who, not only have a deep understanding of NetIQ products but, more importantly, of the business and IT challenges that need to be addressed with the products.

Public training sessions at NetIQ are set in a classroom environment that is conducive to learning. Each student has access to a personal computer within a hands on lab that simulates real world experiences. Classes begin at 9:00 A.M. and generally end at 5:00 P.M. Class size on average is between 5 – 8 participants.

On-Site Training

On-site training brings the NetIQ training course and instructor right to your organisation. You choose the location & our NetIQ Professional Services will deliver a class exclusive for your organisations employees. On-site classes can be customised to fit your organisations needs and to focus on issues surrounding your environment so you can gain maximum benefit.

Computer Based Training

IQ Learning Modules (IQLM) is a self-paced and interactive training course which includes a comprehensive virtual training environment complete with NetIQ Products and hands-on labs. The modular format of the course enables customers to actively learn how to use NetIQ products at their own pace.
